Radha Structure & Engineering Works Pvt.Ltd

Structural and Industrial Sector Products

Introduction

Nepal being one of the developing countries offers lots of different kinds of opportunities. Nowadays so many developmental activities are taking place

throughout the kingdom. Many foreign and domestic companies are starting new business and setting up factories. These kinds of companies require factory sheds, godowns and several other types of structures.

Radha Structure & Engineering Works Pvt. Ltd. was founded more than two decades ago. Since its inception, this company has crossed several frontiers and established several milestones. In more than two decades of our existence we have acquired adequate and sufficient machinery, plants and built up our own infrastructure. We established galvanising unit in 1999 in our persistent effort to provide all services under one roof. We have one of the most experienced and advanced technical team consisting of several full time steel structure specialists, structural engineers, mechanical engineers, electrical engineers and architects having extensive working experience. Our total strength is more than 175 employees (full time / part time / on the pool) and

many full time professional experts. We have in house training programmes to hone the skills and expertise of our employees. We organise workshops

on regular basis every year to enhance group cohesiveness and interpersonal skills. Company's policy is to make industrious culture based on mutual respect and teamwork.

Major Products and Services :

Godown/Cargo Complex :

These types of structures are required for large industrial and commercial establishment. We have several years of experience in designing, fabricating and erecting these types of structures. Some of the major products executed by us include Tribhuvan International Airport Cargo Complex. This is one of the largest structures of its kind of our country.

Factory Shed :

Manufacturing units require this types of structure. During these valuable years we have gained sufficient experience and expertise in designing, fabricating and erecting customised factory sheds to suit variety of manufacturing units.

- Garage
- Quarter
- Pagodas

We have been providing these types of products and services to several multinational and domestic companies since its establishment. We are well known among our esteemed customers for the superior quality of works.

Experience

We have several years of extensive experience in design, manufacture and installation of various types of structural and industrial sector products. We have designed, fabricated and supplied these products to several clients including Lumbini Development Trust; Hotel Malla; Casino Nepal; Nepal Red Cross Society; Hazama Corporation; Dhulikhel Resort; Nepal Television; Meccafferi Gabions Pvt. Ltd.; Kaligandaki Hydel Project; Nepal Engineering College; INSEC; Kathmandu Medical College; Kantipur Engineering College; HANIL KONECO J/V, (Tribhuvan International Airport Improvement Project, Airport Cargo Building Complex) . Apart from structural and industrial sector products Radha Structure & Engineering Works Pvt. Ltd. specialise in following types of steel works also:
